

Donated by USC Canada

Two (2) wooden bowls with a flower pattern on the bottom and puzzle like pattern on the inside. Our Seeds of Survival program staff in Lesotho, Barbara N'Koala, purchased them in Bloemfontein (Today a focal point for most of the surface transport systems in the country. Approximately a dozen roads radiate in all directions and Bloemfontein boasts the largest railway workshop in the country. The city is also an educational centre of note with several English and Afrikaans high schools and colleges attaining reputations for excellence),
